About REcoin

REcoin provides both investors and the average person a safer, more secure and superior alternative to storing their wealth in the form of digital currency.

REcoin is a new cryptocurrency alternative designed to accommodate a wide range of financial transactions and investment goals. Its security is ensured through the use of one of the soundest and most reliable currency backings there is real estate.

Many of those who are looking to invest their earnings face the dilemma of putting their savings into low-interest rate bank accounts or lacking other investment alternatives due to a lack of liquidity.

No real commodities back the world's widely used currencies. Real estate backs REcoin in countries with a developed and stable economies such as the United States, Canada, the U.K., Japan and Switzerland.

Discount scheme:

- The first 10 000,000 REC - 15% discount, 1REC = 0,85 \$
- The first 15 000,000 REC - 12% discount, 1REC = 0,88 \$
- The first 20,000,000 REC - 9% discount, 1REC = 0,91 \$
- The first 25,000,000 REC - discount of 6%, 1REC = 0,94 \$
- The first 30,000,000 REC - 3% discount, 1REC = 0,97 \$
- Further sale is carried out at the rate of 1REC = 1 \$

Roadmap

The first stage of the appearance and development of REcoin ecosystem

- Familiarization with the REcoin crypto currency
- Pre-sale of REcoin tokens

The second stage of development of the ecosystem REcoin

- Worldwide sale of REcoin tokens at a fixed exchange rate
- 1REC = 1USD
- Accumulation of funds in 101ReCoin Trust
- Investing in real estate
- Software development
- Testing and adapting the technical side of REcoin

Development and of the Ecosystem

The third stage of development of REcoin

- Introduction of REcoin turnover
- Increase in the volume
- Building a bonding mechanism with the market

Our Guarantees

REcoin's activities are in full compliance and governed by United States law.

100% of our proceeds from REcoin sales minus maintenance costs are invested into

New technical and economic solutions will be developed for the benefit of REcoin users.

In worst-case scenarios, The REcoin Trust guarantees a liquidity ratio of up

The REcoin wallet is secured by the latest cryptocurrency tools and designed to be

The 101REcoin Trust

The 101RecoinTrust is designed to ensure that all investment activities will be in the interest of REcoin holders and centered around the most profitable forms of real estate.

REcoin is led by an experienced team of brokers, lawyers, and developers and invests its proceeds into global real estate based on the soundest strategies, including:

- Investment into properties with a stable income, short sales, foreclosures and real estate development in the world's leading economies.
- No dividends are paid out to any beneficiaries, meaning that 100% of the net profit from REcoin is reinvested into real estate, minus expenses, and maintenance.
- The society of REcoin holders control the cryptocurrency and vote for any investment decisions that have the potential of affecting 5% of REcoin's market value or more.

REcoin Advisory Board

An effective advisory board, properly composed and structured, can provide non-binding but informed guidance and serve as a tremendous ally in the quest for superior corporate governance. Only companies, that are part of REcoin Ecosystem can become members of the Advisory Board.

Our Team

Maksim Zaslavskiy

CEO, Founder

Max Zaslavsky, the founder, and CEO of the RECoin Group was born in Ukraine in 1979. In the early 90s, his parents moved to New York. Received MS in finance from Baruch College in 2003. By the time, he was finished with higher education he emerged an actual real estate opinion leader. In the late 90s, Max had realized the potential value of the IT sector and decided to combine his extensive expertise in real estate with the overwhelming digital technologies potential.

Having become an expert in equity management, constantly volunteering and participating in many different charities Max was not entirely fulfilled. He pursued law, and having received his LL.M. (Master of Laws) in 2005. Having extensive background in investment management and community service, it was obvious choice to join the investors and real estate entrepreneurs on a single platform with a blockchain based monetary system.

Technical Specification

DOWNLOAD TECH WHITEPAPER

Ethereum cryptocurrency code is used, which means the following options:

- 1. Use of blockchain technology.
- 2. The possibility of mining (using the proof-of-work protection method).
- 3. The ability to create and use smart contracts.

The technology of blockchain proved itself as perhaps the safest way of keeping records of transactions performed within a certain society, each member of which owns a copy of the database distributed among members of the given society.

Blockchain - a chain built from the formed blocks with records of all transactions. A copy of the Blockchain chain or its part is simultaneously stored on multiple computers and synchronized according to the formal rules for constructing the chain of blocks. The information in the blocks is not encrypted and is available in clear form, but is protected from cryptographic changes through hash chains. Thus, the Blockchain database is distributed (decentralized) and cryptographically protected (<https://en.m.wikipedia.org/wiki/Blockchain>).

The possibility of mining, which gives the use of the methodology of protection against false data and fraud PoW, is by far the most widespread and reliable crypto currency in the environment.

A proof of work is a piece of data which is difficult (costly, time-consuming) to produce but easy for others to verify and which satisfies certain requirements. Producing a proof of work can be a random process with low probability so that a lot of trial and error is required on average before a

valid proof of work is generated (https://en.bitcoin.it/wiki/Proof_of_work).

The minimum unit is **10⁻⁴, or 0,0001 REC.**

The conclusion of the block will occur every 20.5s (Similar to the Ethereum software environment, <https://bitinfocharts.com/en/ethereum/>). The block volume limit is 12 KBytes.

SideChains REcoin

It is stipulated in the code of REcoin that for creating sidechains REcoin, it is necessary to have a smart wallet with AltCoin in the amount of 1,000 ALTC.

AltCoin is tokens designed to protect the REcoin cryptocurrency from creating uncontrolled sidechains. Their total emission is 100,000 ALTC.

The mechanism of the ratio of the mining of the newly created sidechain and REcoin is similar to the process of mining REcoin.

ALTC distribution mechanis

- 1

The owner of AltCoin at the time of their issue is the REcoin Foundation. The issue is one-time operation;
- 2

The applicant for the creation of the sidechain submits an application to the REcoin Foundation, which includes a full description of the
- 3

The REcoin Foundation considers the application and, in the case of approval, transfers the required amount of 1000 ALC to the applicant, which

TRANSACTION FEE

Conducting transactions in the cryptocurrency REcoin implies the possibility of charging a commission for including this transaction in a block, similar to that practiced in other crypto-currencies.

Miners will receive **92.5%** of the amount of the voluntary commission.

The remaining **7.5%** of the amount of the voluntary commission will be distributed among the REcoin **Founder Maksim Zaslavskiy (0,5%),** the organization providing technical and service support **(1%)** and donors - charitable organizations and their associations, which is **6%** of the voluntary transaction commission.
